Emerging Trends in Biotechnology & Management

Dear Delegates,

We feel honoured to invite you to attend the International Symposium on **“Emerging Trends in Biotechnology and Management”** on Dec. 19, 2008 (Friday) at Biyani Institute of Science and Management (BISMA) in Jaipur, India.

Biotechnology is not just an innovative academic activity, but rather has an intense industrial and commercial involvement. Therefore, the objective of this symposium is to understand the interplay between Biotechnological innovations and management and thus to provide and share the knowledge needed to turn the challenges of the Biotech industry into growth opportunities. This symposium will bring together delegates, eminent scientists, research scholars, young minds of two diverse fields of Biotechnology and Management and thus this event will not only provide an interdisciplinary forum for the discussion of recent advances in research, development and application of innovations in Biotechnology field but also give an opportunity to both the community of Biotechnology people and Management people to share their expertise and develop a common vision for the future generation.

As a pre-symposium event, we also invite students from Management field to make them aware of different technologies used in the field of Biotechnology such as Nanotechnology, Bioinformatics, Proteomics, Genomics and others on Dec. 16, 2008 (Tuesday) between 9:00 to 11:30 in the campus of BISMA.

I again welcome you heartily to this symposium at BISMA in pink-city Jaipur, India.

Manish Biyani, Ph.D.
